

**DRUGS IN SPORT  
LIST 2012**

**I PLAY FAIR**

**SAY NO! TO DOPING**

*South African Institute for  
Drug-Free Sport*

## NOTE

Users of this Handbook might find medications or pharmaceutical substances, particularly generic antibiotics and microcimals, that are not listed.

Preparations containing alternative substances / supplements are not included in this Handbook.

## DISCLAIMER

Although every effort has been made to ensure information in this list is accurate, the authors and the South African Institute for Drug-Free Sport cannot accept responsibility for the currency of the information or for any errors, omissions or inaccuracies.

This list is formulated in and for South Africa, based on local pharmaceutical information.

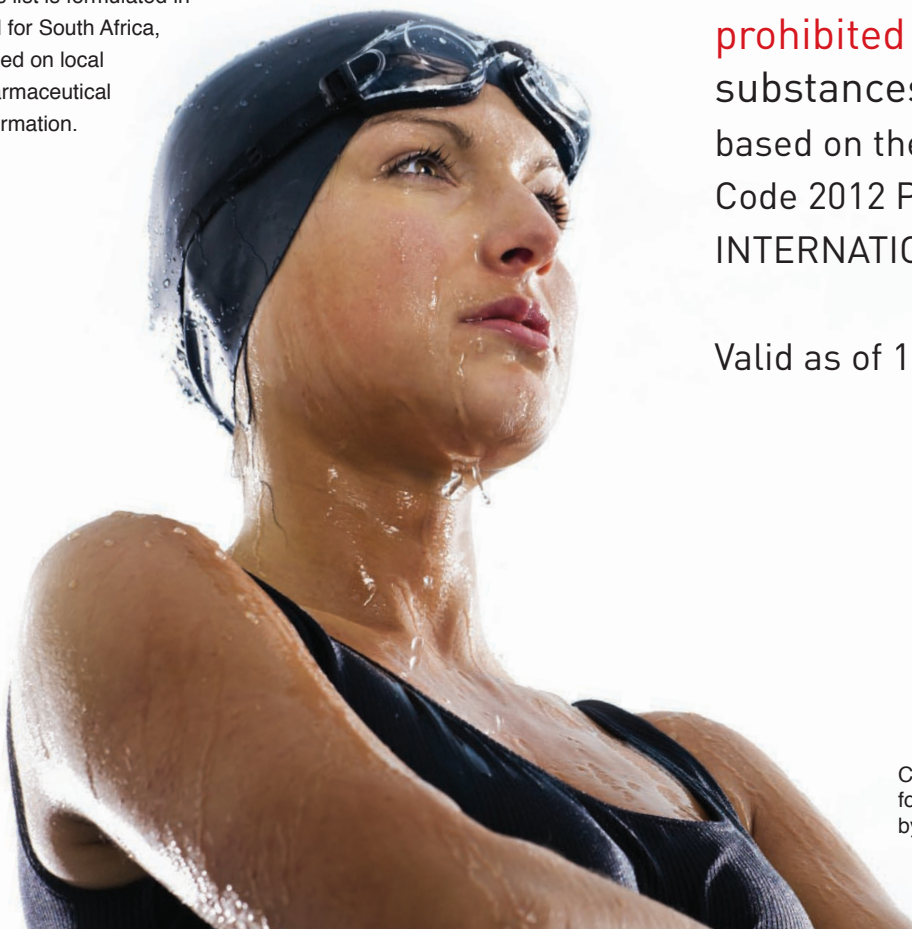

A list of South African  
TRADE NAMES of  
**prohibited**, **restricted**  
and permitted drugs /  
preparations  
&

GENERIC NAMES of  
**prohibited** and **restricted**  
substances

based on the World Anti-Doping  
Code 2012 PROHIBITED LIST  
INTERNATIONAL STANDARD

Valid as of 1 January 2012

Compiled for the South African Institute  
for Drug-Free Sport  
by Marlize Smuts (MPharm)

## EXPLANATORY INFORMATION

Colour Code: Interpretation:

<u>Red</u>	<u>Prohibited Drugs IN-COMPETITION only (only during specified competition periods)</u>
<i>Red italics</i>	<i>Generic names of prohibited substances: IN- and OUT-of-COMPETITION</i>
<u><i>red italics</i></u>	<u><i>Generic names of prohibited substances: IN-COMPETITION only</i></u>
Blue	Drugs Prohibited IN PARTICULAR SPORTS
<i>Blue Italics</i>	<i>Generic names of prohibited substances: IN PARTICULAR SPORTS</i>
[1] – [8]	Notes - see page 62 and 63

## THERAPEUTIC USE EXEMPTION (TUE)

“Athletes, like all others, may have illnesses or conditions that require them to take particular medications”.

“If the medication an athlete is required to take to treat an illness or condition happens to fall under the Prohibited List, a Therapeutic Use Exemption (TUE) may give that athlete the authorization to take the needed medicine.

The purpose of the International Standard for Therapeutic Use Exemptions (ISTUE) is to ensure that the process of granting TUEs is harmonized across sports and countries”.

For further information, go to the WADA website:

[http://www.wada-ama.org/Documents/World\\_Anti-Doping\\_Program/WADP-IS-TUE/2011/WADA\\_ISTUE\\_2011\\_EN.pdf](http://www.wada-ama.org/Documents/World_Anti-Doping_Program/WADP-IS-TUE/2011/WADA_ISTUE_2011_EN.pdf)

Please contact Anique Coetzee at the South African Institute for Drug-Free Sport with regard to queries on TUEs at [anique@drugfreesport.org.za](mailto:anique@drugfreesport.org.za) or at 0861 0 72437

To support the decisions of TUEs regarding the use of intravenous infusions, attention is drawn to the fact that medical information is provided on the WADA Web site:

[http://www.wada-ama.org/Documents/Science\\_Medicine/Medical\\_info\\_to\\_support\\_TUECs/WADA\\_Medical\\_info\\_IV\\_infusions\\_v.2.2\\_March2010\\_EN.pdf](http://www.wada-ama.org/Documents/Science_Medicine/Medical_info_to_support_TUECs/WADA_Medical_info_IV_infusions_v.2.2_March2010_EN.pdf)

MORE INTELLIGENT AND  
TARGETED TESTING”**

## NOTES [1] - [8]

### [1] BETA-2 AGONISTS

All beta-2 agonists are prohibited In- and Out-of-Competition except salbutamol (maximum 1600 micrograms over 24 hours), formoterol (maximum 36 micrograms over 24 hours) and salmeterol when taken by inhalation in accordance with the manufacturers' recommended therapeutic regime.

To clarify, when used by inhalation, salbutamol, formoterol and salmeterol no longer require a DoU or a TUE.

Refer to section S3 (Beta-2 agonists) of the WADA 2012 Prohibited List

### [2] GLUCOCORTICOSTEROIDS

All glucocorticosteroids are prohibited In-Competition when administered oral, intravenous, intramuscular or rectal routes.

To clarify, when used by inhalation or nasally, glucocorticosteroids no longer require a DoU or a TUE

Refer to section S9 (Glucocorticosteroids) of the WADA 2012 Prohibited List.

### [3] ALCOHOL

Alcohol (ethanol) is prohibited In-Competition only, in the following sports. Detection will be conducted by analysis of breath and/or blood. The doping violation threshold (haematological values) is 0.10 g/L.

- Aeronautic (FAI)
- Archery (FITA)
- Automobile (FIA)
- Karate (WKF)
- Motorcycling (FIM)
- Powerboating (UIM)

Refer to section P1 (Alcohol) of the WADA 2012 Prohibited Lis.

### [4] BETA-BLOCKERS

Unless otherwise specified, beta-blockers are prohibited In-Competition only, in the following sports.

- Aeronautic (FAI)
- Archery (FITA) (also prohibited Out-of-Competition)
- Automobile (FIA)
- Billiards (all disciplines) (WCBS)
- Boules (CMSB)
- Bridge (FMB)
- Darts (WDF)
- Golf (IGF)
- Ninepin and Tenpin Bowling (FIQ)
- Powerboating (UIM)
- Shooting (ISSF, IPC) (also prohibited Out-of-Competition)
- Skiing / Snowboarding (FIS) in ski jumping, freestyle aerials / halfpipe and snowboard halfpipe / big air

Beta-blockers include, but are not limited to, the following:

Acebutolol, alprenolol, atenolol, betaxolol, bisoprolol, bunolol, carteolol, carvedilol, celiprolol, esmolol, labetalol, levobunolol, metipranolol, metoprolol, nadolol, oxprenolol, pindolol, propranolol, sotalol, timolol.

Refer to section P2 (Beta-Blockers) of the WADA 2012 Prohibited List

### [5] AGENTS PROHIBITED IN MALES ONLY (In and Out-of-Competition)

Certain hormones in section S2:

Chorionic Gonadotrophin (CG) & Luteinizing Hormone (LH) are prohibited in males.

Refer to section S2 (Peptide Hormones, Growth Factors and Related Substances) of the WADA 2012 Prohibited List.

### [6] PSEUDOEPHEDRINE

Pseudoephedrine is prohibited In-Competition only when its concentration in urine is greater than 150 micrograms per millilitre. Refer to section S6 (Stimulants) of the WADA 2012 Prohibited List and the 2012 Monitoring Program.

Clarifying information (WADA):

- The established threshold levels may be reached (rarely, but possibly) by some individuals within 6-20 hours of intake of some long-lasting therapeutic formulations.
- Advise athletes to stop taking pills containing pseudoephedrine at least 24 hours before competition.  
For therapeutic applications during the In-Competition period, consider the use of alternative permitted medications upon previous consultation with a physician, or apply for a Therapeutic Use Exemption (TUE) for the use of pseudoephedrine for therapeutic purpose(s).
- The threshold level has been established based on the intake of therapeutic doses of pseudoephedrine, defined as a maximum daily dose of 240mg pseudoephedrine taken either as:
  - i) four (4) daily administrations (one every 4-6 hours) of a 60mg pill (or 2 x 30mg pills), or
  - ii) two (2) daily administrations (one every 12 hours) of a 120mg pill, or
  - iii) one (1) daily administration of a 240mg pill.
- In line with this dosing regimen, the intake, for example, of a single daily dose of 3 x 60mg pills constitutes a suprathreshold administration that may lead to an Adverse Analytical Finding

### [7] GLYCEROL

Glycerol is prohibited as a plasma expander which requires the ingestion of quantities far beyond that which are commonly found in foodstuffs and toiletries. The normal use of foodstuffs and toiletries that contains glycerol (glycerine), will not cause a competitor to test positive. Refer to section S5 (Diuretics and other masking agents) of the WADA 2012 Prohibited List.

### [8] NOTES ON SPECIFIC STIMULANTS:

- Adrenaline: Local administration (e.g. nasal, ophthalmologic) of adrenaline or co-administration with local anaesthetic agents is not prohibited.
- Cathine (nor-pseudoephedrine): Prohibited when its concentration in urine is greater than 5 micrograms per millilitre.
- Ephedrine & methylephedrine: Each of ephedrine and methylephedrine is prohibited when its concentration in urine is greater than 10 micrograms per millilitre.

Refer to section S6 (Stimulants) of the WADA 2012 Prohibited List.
